GitHub Profile

PROFESSIONAL SUMMARY

Passionate IT undergraduate with hands-on experience in full-stack software engineering, AI-powered applications, and modern web development using the MERN stack and Python. Experienced in building scalable applications, developing RESTful APIs, debugging, testing, and collaborating in Agile-based development environments. Eager to learn, contribute to real-world software projects, and continuously improve coding and problem-solving skills.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Next.js, FastAPI
- **Databases:** MongoDB, SQLite, PostgreSQL
- **Software Engineering:** RESTful APIs, CRUD Operations, JWT Authentication, Git, GitHub, Debugging, Testing
- **Machine Learning & AI:** NLP, TF-IDF Vectorization, Cosine Similarity, Sentiment Analysis
- **Tools & Technologies:** Tailwind CSS, Scikit-learn, Pandas, NumPy

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) BSc (Hons) in Information Technology	2021 – 2026
Mahinda College G.C.E Advanced Level – Physical Stream	2006 – 2019

WORK EXPERIENCE

Ruhunu Distributors <i>Digital Marketing Assistant</i>	2022 – 2024
--	-------------

- Applied modern digital solutions to improve customer engagement and business communication workflows.
- Used technology-driven approaches to identify customer issues and support practical problem-solving initiatives.
- Collaborated with cross-functional team members to support daily operations and improve workflow efficiency.

PROJECTS

AI-Powered Product Feedback Platform (FeedPulse)

- Developed a full-stack software application using Next.js, Node.js, Express.js, and MongoDB.
- Integrated OpenAI API for sentiment analysis, category classification, and intelligent feedback prioritization.
- Implemented secure JWT authentication, protected routes, validation, and backend error handling.
- Built scalable RESTful APIs, feedback filtering, pagination, and responsive user interfaces.
- Conducted debugging, testing, and feature validation to improve application reliability and performance.

Lead Management System (Enterprise CRM)

- Developed a scalable MERN stack software system for lead tracking and customer relationship management.

- Implemented JWT authentication, role-based access control, CRUD operations, and RESTful APIs.
- Built dashboard analytics and responsive interfaces for monitoring business activities in real time.
- Performed backend validation, debugging, and testing to ensure reliable software performance.

Early Childhood Education Web Application (Research Project)

- Developed an ML and NLP-based software application to predict teaching styles and student behaviors.
- Integrated an AI-powered parental chatbot within the platform.
- Achieved up to 86% prediction accuracy through machine learning models and data analysis.

Music Recommendation System Using Machine Learning

- Developed an AI-powered recommendation system using Python, FastAPI, React.js, and Scikit-learn.
- Implemented content-based filtering, TF-IDF vectorization, cosine similarity, and mood-based recommendation functionality.
- Built RESTful APIs and interactive frontend dashboards for recommendation management.
- Conducted data preprocessing, debugging, testing, and feature improvements to enhance recommendation quality.

Gym Management System for Mansa Fitness

- Developed MERN stack functionalities for member management, payment tracking, and efficient data handling.

Full-Stack Shopping Mall Application

- Built a full-stack MERN application with user authentication, product management, and responsive shopping features.

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Attention to Detail
- Time Management
- Adaptability
- Effective Communication
- Team Collaboration

LANGUAGES

- Sinhala
- English
